**Attachments:** SH Bell Manganese Cleanup Fact Sheet v.12-18-18-OECredits.docx

Dave,

Just an update on where we're at, we are pursuing Bell for the cleanup of the five Mn residential homes, may be unlikely but EPA will conduct the cleanups if Bell refuses. Currently there are 14 homes exceeding 1200ppm for lead, applying our sensitive population criteria( pregnant resident or child under 7) that could drop down to maybe one resident. We're still discussing the lead issue in house with ATSDR and our pre-remedial group so nothing is final. A new fact sheet is going out in the mail after the holidays summarizing the current status, **draft** copy attached please do not release. The potential removal action on the Mn homes would likely be in the spring or early summer. Any questions, give me a call or e-mail.
